PROFILE

Aspiring Computer Science Engineer with skills in web and mobile app development using PHP, Python, MySQL, and Flutter.

PROJECT TITLE

Direct To Vendor   2025 - PRESENT
Making platform for directly connect with vendor

Direct To Vendor is a web and mobile platform designed to eliminate middlemen by enabling direct, real-time communication between customers and local vendors like farmers, electricians, and plumbers. Built with Flutter, PHP, and MySQL, it features role-based dashboards, service broadcasting, AI-powered vendor suggestions, and location-based search to streamline service discovery and delivery.

Time Table Generator   2024-2025
Making automatic time table

A PHP-based application that dynamically generates conflict-free timetables for institutions by processing user inputs and managing schedules efficiently.

Ouize Website   2023- 2024
Developing aptitude skills

A quiz application developed in Python that allows users to answer questions from various categories, tracks scores, and provides instant feedback. It's simple, interactive, and easy to customize.
